User Requirements
- Login Interface/System
- Registration Interface/System
- Persistent User Information Storage
- View/Create Meetings

System Requirements
- FireStore Cloud Storage
- SMS/Email Notification System
- Participant Feedback System
- Google/Apple Calendar Interfacing

Risk Analysis
- Ineffective Email/SMS Notifications: User didn't receive or didn't view the Email/SMS reminder, could add user confirmation/feedback to reminders to confirm availability.
- Incompatible registration information: User's email/phone number is inadequate to create an account (Obsolete email/International phone #), allow temporary accounts or
- Overlapping Meeting Times/ Time Zone Compatibility: Ensure meeting participants are not in other meetings at the same time, and that meetings at different times/ time zones are accounted for.
